DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1, Line 10, REPLACE "the compressed sequence" WITH "a compressed sequence".

Claim 2, line 1, REPLACE "wherein the step of determining" WITH "further".

Claim 2, line 3, REPLACE "the absolute value" WITH "an absolute value".

Claim 5, line 2, REPLACE "the lowest absolute value" WITH "a lowest absolute value".

Response to Amendments

Applicant's amendment filed one 11/9/2007 has been carefully considered. As a result of the amendment, the previous rejection/objection made in the previous office action is overcome.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 1-17 are allowable.

The following is an examiner's statement of reasons for allowance: Claims 1 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly teach or suggest claimed method comprising among other limitation, a novel and unobvious limitation of "quantizing the first sequence of integers of the frame using a predicted sequence of integers representing the first sequence of integers to produce a second sequence of integers" structurally and functionally interconnected with other limitations in the manner as cited in claim and dependent claims 2-14 and 17.

Claim 15 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly teach or suggest claimed system comprising among other limitation, a novel and unobvious limitation of "adaptive quantization means arranged to quantize the first sequence of integers of the frame using a predicted sequence of integers representing the first sequence of integers to produce a second sequence of integers" structurally and functionally interconnected with other limitations in the manner as cited in the claim and dependent claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited References

The prior art made of record and not relied upon is considered pertinent to application's disclosures. The cited references relate to instant application's subject matter.
